BE READY WITH NASCO HEALTHCARE
THE INDUSTRY LEADER IN TRAINING SIMULATION FOR
75+ YEARS
Nasco HEALTHCARE

Available in female version, and in light and medium skin tones.

ALEX

The first simulator combining full-body physiological simulation with verbal functionality.

Enables communication training in a single scenario-driven instructor-controlled experience.
Built-in IrisCam™
Only simulator with an **HD camera** in the eyes so you can view the live or recorded interaction from a patient point of view

Bluetooth™-enabled
Features **SmartScope™** to allow you to listen to crystal-clear, realistic lung, heart and bowel sounds) and **SmartCuff™** to measure blood pressure

Cloud-based
Access ALEX from **any device** – no need for workstations or access licenses

Speech and touch recognition
Automatically responds in a **conversational style** based on pre-defined medical interview questions

Multilingual
Speaks and understands **English, French and Spanish** with new languages being added

Recording capabilities
Features **speech-to-text**, so you have a script of the interaction to provide feedback

Ideal simulator to train nurses, medical students & patient care personnel to:
- Learn critical thinking, decision-making & priority-setting skills
- Conduct initial patient assessments
- Conduct clinical interviews
- Receive feedback on procedures (e.g., i.v. administration, wound care, catheterization)

This manikin is intended to be used as an instructional aide in the teaching and demonstrating of patient communication training. Actual product may vary slightly from photo. Nasco Healthcare reserves the right to change product color, materials, supplies, or function as needed.
